RENTHAL Kuryakyn Progressive Suspension Mustang Seats Vance & Hines

Notes From The Prof:

MUSTANG MAKES WORLD'S BEST TOURING BIKE BETTER F6B + Mustang = Style, Performance & Comfort

According to Honda, the new Gold Wing F6B takes the world's greatest touring motorcycle, the Gold Wing, and puts a whole new spin on it. The F6B is lighter, trimmer and leaner than the old 'Wing. The F6B offers plenty of storage and upgraded performance, along with many of the Gold Wing's luxury features. However we have found one area for improvement: The Seat!

Not saying the stock seat is bad, but Mustang's all new Tripper Fastback is better by design. The 17" wide front seat sits the rider about 1" lower than stock for maximum control of the bike while stopped. With the Tripper-style seat, the rider is also positioned further back "into the bike" rather than perched on top, while the notch in the stepped seat offers a full 8" of all-day back support.

The passenger seat is 14" wide and is contoured to take pressure off one's thighs. Now you and your passenger can now enjoy outstanding comfort and longer rides together. Both styles are designed to work with or without the stock passenger backrest.

Part #76840 Tripper Fastback
Retail \$579

Part #76841 Tripper Fastback Deluxe (Tuck And Roll Center)
Retail \$599
